

Doctor! Doctor!

Game Focus: ball control – dribbling and passing; movement

How to Play:

- Divide players into 2 teams and give each player a ball
- Designate one player from each team to be the doctor and place one in each of the opposing corner square safe zones without a ball
- Players from both teams dribble their balls around the grid, attempting to hit opposing team players below the knees with passes
- When a player or their ball is struck by an opposing player's ball they are frozen and must call for the doctor
- The doctor must run out and tag their teammate to unfreeze them; opposing players may try to hit the doctor below the knees with passes while they're out of the safe zone
- The game is won when one team succeeds in hitting the other team's doctor with a pass

Set-up: mark a 10 yard square (adjust to suit group size) with two smaller safe zone squares in opposing corners
